

SOPHIE'S COMPANIONS FOR VETERANS

With your support, we will continue the connection of veteran/ companion bond to help heal emotional wounds.

- Janet

Every 65 minutes a veteran commits suicide and 30% have considered it, research shows. That is why in 2016, Sophie's Companions for Veterans was formed. We are committed to fighting against the suicidal battle, by joining a companion with the veteran suffering from PTSD (or more).

The bond between animal and human has the amazing power to ease emotional wounds for both Veterans and animals alike. By joining them, we help build a trusting and lasting relationship that benefits the quality of life for both. This is a free service to our veterans.

Interested in adopting one of our Veteran's "Companion" Animals? Head to our website and download the pre-adoption questionnaire. www.sophiesanimalfund.com

COMPANIONS

The companions will all be animals from kill shelters (dogs or cats) or rescues only.

VETERANS

We will be working with the Dayton Veteran's Affairs Hospital and other Veterans in the area.

Those who join us will have passed through an interview and screening process to ensure that the companion and veteran are a good match.

We are proud to partner with trainers that specialize in service dog & obedience training, medical alert, search & rescue, and live find detection.

In our Journey,
we will be able to connect
so many more
veterans & rescues
together to fulfill
a life of happiness
& contentment

*Proud to be partnered with
The Dayton Foundation*
